> **Open to software engineering, AI, data analytics, and DevOps roles**

PROFILE

Computer Engineer and software engineer with a strong foundation in full-stack development, AI systems, data analytics and DevOps. I graduated from Addis Ababa University with a CGPA of 3.70 and have hands-on experience building production software, automation workflows, GIS platforms and IoT solutions across telecom, business and engineering environments.

KEY ACHIEVEMENTS

- Graduated from Addis Ababa University with a CGPA of 3.70 in Computer Engineering.
- Worked in telecom customer analytics, pricing and customer value management at Safaricom Ethiopia.
- Built AI, analytics and automation tools across research, software and business workflows.
- Delivered IoT, GIS and full-stack application projects with real-world operational impact.

CORE SKILLS

Languages	TypeScript, JavaScript, Python, Java, SQL
Front end	React, Next.js, React Native, Angular, Tailwind CSS, Shadcn UI, Redux, Zustand
Back end	Node.js, Express, FastAPI, Django, Hono, REST APIs, GraphQL, microservices
AI & LLM	LangChain, LangGraph, RAG, AI Agents, OpenAI APIs, MCP, OpenSearch
Data	SQL, Oracle, PostgreSQL, MongoDB, MySQL, Prisma, Firebase, analytics and KPI reporting
Cloud & DevOps	Docker, Kubernetes (basic), AWS, Jenkins, GitHub Actions, CI/CD, cloud deployment
Testing	Playwright, Jest, Cypress, Robot Framework, automated QA for web and APIs
IoT & Embedded	ESP32, Arduino, sensor integration, circuit design, prototyping and cloud-connected systems

PROFESSIONAL EXPERIENCE

Data Analyst · Safaricom Ethiopia Telecommunications PLC

Jun 2026 - Present

Addis Ababa, Ethiopia · Pricing, Reporting & Customer Value Management (CVM).

- Analyze large-scale customer, revenue, traffic, product and operational datasets to generate actionable business insights.
- Develop KPI reports and support customer and product performance analysis across bundles, usage and business outcomes.
- Use SQL and Oracle to transform data into metrics, reports and decision-support outputs for pricing and customer behavior analysis.

> **Pricing, Reporting & CVM** **Current**
>
> - Customer and revenue analytics across telecom data sets.
> - Bundle performance, conversion analysis and usage/revenue reporting.
> - Geographic and cluster analysis to support customer segmentation and decision-making.
>
> **Stack:** SQL, Oracle, KPI reporting, customer analytics, telecom data

Business Analyst · Safaricom Ethiopia Telecommunications

Apr 2026 - Jun 2026

Addis Ababa, Ethiopia · Requirements analysis and solution design.

- Gathered and analyzed business requirements from stakeholders and translated them into clear functional and technical requirements.
- Prepared Business Requirement Documents (BRD), user stories, acceptance criteria and solution design documentation.
- Collaborated with business and technical teams to validate requirements and ensure alignment with strategic objectives.

QA Engineer · QA and software quality work
Dec 2025 - Mar 2026

Addis Ababa, Ethiopia · Automation and software quality assurance.

- Designed and executed manual and automated test cases to ensure software quality and reliability.
- Developed automated tests with Robot Framework and Playwright for functional, regression, integration and end-to-end testing.
- Identified, documented and tracked defects through the software development lifecycle.
- Integrated automated testing into CI/CD pipelines using Jenkins and validated APIs and application functionality.

Software Engineer · Power Ethiopia
Oct 2025 - Apr 2026

Remote · Web platform development and payment workflows.

- Led the company WordPress website and landing page development, including Elementor customization and plugin configuration.
- Designed and maintained the training registration system and integrated FenanPay for local payment processing.
- Supported backend and frontend teams by improving API integration and business-facing dashboards.

Frontend Developer · Ambalay Maps
Aug 2025 - Sep 2025

Remote · GIS and mapping platform.

- Worked on a geospatial web platform with route planning, geocoding and traffic analysis features.
- Built custom map layers, markers and UX components using React, Next.js and TypeScript.
- Collaborated with backend engineers to integrate geospatial APIs and improve map performance.

SELECTED PROJECTS

- **Honey Badger AI** (AI / Agentic AI) - Agentic AI research assistant with retrieval, verification and external tool use for research-heavy workflows.
- **Safaricom Customer, Revenue & Traffic Analytics** (SQL / Oracle / CVM) - Enterprise-scale analytics on customer behavior, revenue, bundle performance and telecom KPI reporting.
- **SmartDrainX** (IoT / Full-Stack) - IoT-based smart drainage monitoring system with ESP32 sensors, cloud storage, alerts and a live dashboard.
- **Ambalay Maps** (GIS / Mapping) - Geospatial mapping product with route planning, custom layers, geocoding and traffic visualization features.
- **QA Automation Framework** (Robot Framework / Playwright / CI/CD) - Automated testing framework for functional, regression and end-to-end validation across software releases.
- **Portfolio / Interview Agent** (AI / Portfolio System) - AI-guided portfolio assistant for exploring skills, experience, projects and technical capabilities.

EDUCATION

BSc in Computer Engineering
2021 - 2025

Addis Ababa University (AAU)

CGPA: 3.70. Final project: IoT-Based Smart Drainage Monitoring System.

Courses: Data Structures and Algorithms, Embedded Systems, Web Development, Database Systems

LANGUAGES

Amharic
Native

English
Professional working proficiency
